FAQs: Conduit Tubing, Steel Conduit

1. What happened to TT 1, the standard for tapered tubular structures? Is there a replacement standard?

What happened to TT 1, the standard for tapered tubular structures? Is there a replacement standard? "TT 1 was rescinded in the late 1980's, and no NEMA section currently works on tapered tubular structures. ASTM does have a relevant standard: A595-98, Standard Specification for Steel Tubes, Low-Carbon, Tapered for Structural Use. Their website is www.astm.org."
