American National Standard

Electric Lamps

Condensing Dichroic Coated Integral Reflector Side Pin Tungsten Halogen Projection Lamps with GX7.9 Bases

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. It is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. Users are cautioned to obtain the latest editions. The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.
(This language is not part of the American National Standard.)
This Standard is being maintained under the stabilized maintenance option. Proposals for
modification or improvement of this Standard are welcome. They should be sent to the National
Electrical Manufacturers Association, 1300 N 17th Street, Suite 900, Arlington, VA 22209 or sent
via the NEMA website (http://www.nema.org).
Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer. An American National Standard implies a consensus of those substantially concerned with its scope and provisions. Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution. The existence of an American National Standard does not in any respect preclude anyone, whether s/he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. It is intended as a guide to aid the manufacturer, the consumer, and the general public.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the Committee Secretariat referred to on the title page.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

**FOREWORD** (This Foreword is not part of ANSI C78.1434-2001)

Suggestions for improvement of this standard will be welcome. They should be sent to the Secretariat, C78 Committee, National Electrical Manufacturers Association, 1300 North 17th Street, Suite 1847, Rosslyn, VA 22209. This standard was processed and approved for submittal to ANSI by Accredited Standards Committee on Electric lamps, C78, and its subcommittee, C78-1. Approval of the standard does not necessarily imply that all committee members voted for its approval. Information concerning the approval of this standard is based on the documents listed in the table below:

<table>

</table>

At the time of publications the C78 committee consisted of the following members:

**Al Rousseau, Chair C78**  
Bernie Rachel, Technical Coordinator  
Randolph N. Roy, Secretariat  
Ken Denton, Consulting Editor

**Organization Represented:**  
Advance Transformer Company  
Edison Electric Institute  
GE Lighting  
Illuminating Engineering Society  
Intertek Testing Services, Inc.  
MagneTek  
National Electrical Manufacturers Association  
OSRAM SYLVANIA INC.  
Philips Lighting Company  
Underwriters Laboratories, Inc.

**Name of Representative:**  
Norman Grimshaw  
William Maguire (Delegate)  
Edward Yandek  
Rita M. Harrold  
David Ellis  
Michael A. Stein  
William Buckson (Principle Delegate)  
Don Miletich (Alternate Delegate)  
Fred Carpenter (Alternate Delegate)  
Peter Bleasby  
Al Rousseau  
David Belt

At the time of publications the C78-1 Sub-committee consisted of the following members:

**Bernie Rachel, Chair C78-1**

**Organization Represented:**  
GE Lighting  
OSRAM SYLVANIA INC.  
Philips Lighting Company  
Underwriters Laboratories, Inc.

American National Standard

Condensing Dichroic Coated Integral Reflector Side Pin Tungsten Halogen Projection Lamps with GX7.9 Bases

1 Scope

This standard consolidates previous standards for certain low voltage condensing dichroic-coated integral reflector side pin tungsten halogen projection lamps with GX7.9 bases designed for large screen projection systems and used in 8mm and 16mm projector applications. The lamp types contained in this standard are not to be considered as interchangeable although they may physically fit into systems with GX7.9 lampholders. Photometry performance of each lamp depends upon the photometry appraisal system for which it was designed as well as the system in which the lamp is used. Photometry appraisal and end use systems may or may not be the same.

Condensing integral reflector side pin tungsten halogen projection lamps with GX7.9 bases having the ANSI lamp designations, DNF and EMM, are included in this Standard.
