

American National Standard

Approved: February 15, 2018 Secretariat: ANSLG -National Electrical Manufacturers Association

For Electric Lamps

Dimensions for Projection Lamps –

G17q and GX17q Based Four-pin,
Prefocus, for Base-down Operation

American National Standard

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer. An American National Standard implies a consensus of those substantially concerned with its scope and provisions. Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution. The existence of an American National Standard does not in any respect preclude anyone, whether s/he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. It is intended as a guide to aid the manufacturer, the consumer, and the general public.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the Committee Secretariat referred to on the title page.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Foreword (This foreword is not part of American National Standard C78.1402-2004)

Suggestions for improvement of this standard should be submitted to the Secretariat C78, American National Standard Lighting Group (NEMA), 1300 North 17th Street, Suite 900, Rosslyn, VA 22209.

This standard was processed and approved by Accredited Standards Committee on Electric Lamps, C78, and its Working Group, C78 WG 01. Working Group approval of the standard does not necessarily imply that all working group members voted for that approval.

Information concerning approval of this standard is based on the documents listed in the table below.

Editor's Note: During the final editorial review, changes were made to select sections of this published document only, and not to the working base document.

Amendment / Change	CDV	RV
Revision	C78_1_4161	C78_1_4162

David Mullen, Chairman, ASC 78
Randolph N. Roy, ANSLG Secretariat & Senior Editor
Matthew C. Clark, Coordinating Editor

1. Scope

- 1.1 This standard establishes the dimensions essential to the interchangeability of four-pin, prefocus projection lamps for base-down operation of T10 and T12 bulb sizes. It is not the intent of this standard to prescribe operating characteristics or details of design. This standard does not apply to internal condensing reflector-type lamps not requiring external optical systems.
