

FAQs: Polymer Raceway

1. My customers are requesting that my product meet TC 14. Can you tell me the date of your last revision and at the same time I would need a copy of your last revision. I'm now installing a non metallic (FRE fiberglass reinforce epoxy) conduit in construction site and they are demanding a NEMA standard.

My customers are requesting that my product meet TC 14. Can you tell me the date of your last revision and at the same time I would need a copy of your last revision. I'm now installing a non metallic (FRE fiberglass reinforce epoxy) conduit in construction site and they are demanding a NEMA standard. The most current version of TC 14 is TC 14-1984. It was last reaffirmed (no changes) in 1997. Please call Global Engineering at 1-800-854-7179, or 1-303-397-7956 (outside the U.S.) or go to their website, www.ihs.global.com.
